

FAQ

What does laser therapy have over other forms of therapy?

It does not require the use of drugs or surgery, there are no known side effects and it is quick/convenient. Studies have shown that it is equal to or more effective than other forms of physical therapy. These studies were performed at many prestigious institutions including Harvard University.

Does it hurt? What does the treatment feel like/

There is little or no sensation during treatment. There is no pain associated during laser applications. Laser treatment is relaxing and some people even fall asleep.

How long does the treatment take?

The typical course of treatment is 10 to 15 minutes, depending on the size of the area being treated. Treatments are typically received 2 to 3 times a week. Treatment plans are determined on an individual basis.

How long before results are felt?

You may feel improvement in your condition (usually pain reduction) after 1 to 3 treatments. For some more chronic conditions it may take up to 6 visits to feel the benefits of laser therapy. Not everyone responds to laser therapy and results cannot be guaranteed.

Are the results long lasting?

MLS Laser Therapy is about healing. It's not about masking or covering up a condition. When you feel better from this therapy ... it's because you are better. Therefore, results have been found to be quite long lasting.

Can it be used in conjunction with other forms of treatment?

Yes, MLS Laser Therapy is sometimes more effective when combined with other forms of therapy, including physical therapy, chiropractic, massage, soft tissue mobilisation, electrotherapy and following surgery.

How do I know if laser therapy is right for me?

We will evaluate your condition and perform a complete laser therapy examination to determine if you are a candidate for this procedure. Call us to schedule your evaluation or consultation with one of the doctors. Consultations are always at no cost to the patient.

Can laser therapy be used over medical implants or over metal?

Yes, laser therapy is a light treatment. No heating is involved with the surgical or metal implants. It can be used safely with no side effects. It is extremely effective for post-operative wound healing. Many hip and knee replacement patients see us for care.

Affordable, Effective Pain Treatment / No Known Side Effects
